

## Permanent Mount Rack

The Permanent Mount roof rack mounts directly to the vehicle roof top without using the Lo-Pro tracks. ProRac engineered mounting technology is utilized to provide a simple but incredibly strong mounting platform. UV stabilized Santoprene® foot pad is fitted to the UV stabilized super tough nylon foot to seal and prevent any roof rack vibration. The rack offers a rugged aerodynamic design and is compatible with all ProRac application products. The ProRac Pro-File crossbars are designed with a unique profile extruded from Aluminum 6063 alloy giving you a hefty 150 lb. total load capacity.

### Engineered Advantages:

- Powder coated aluminum construction for light-weight strength and corrosive resistance
- Crossbars have an integrated T-SLOT providing a clean looking and secure mounting method for bike carriers, load stops, ski racks, water sport carriers, cargo boxes, etc.
- Unique extrusion profile provides 150 lb. load capacity
- Crossbars are available in multiple widths
